

NORTHWEST PLANT COMPANY

Raspberry Variety Chart

Variety	Season	Size	Fruit Qualities	Color	Plant Qualities	Market	Diseases
Rudi	Early, condensed	S-M	Moderately firm, excellent flavor, avg Brix, avg yield	Med red	Vigorous canes, normal laterals	Processing	Susceptible to RBDV and <i>Phytophthora rubi</i>
Squamish USPP# 28,444	Early	M	Firm, good flavor, avg Brix, avg yield	Med red	Normal laterals	Fresh and processing	Susceptible to RBDV; Tolerates <i>Phytophthora rubi</i> better than Malahat
Malahat	Early	M-L	Medium firmness, very good flavor, low-med yield	Med red	Vigorous	Fresh	Very susceptible to root rot
Willamette	Early	S-M	Moderately firm, slight tart flavor	Dark red	Vigorous	Processing	RBDV resistant; Root rot susceptible
EarlyBell™ '1237057' USPP# 36,027	Early condensed	S-M	Very firm, good flavor, above avg yield	Med-dark red	Straight canes, minimal spines	IQF	No RBDV detected; Shows tolerance to <i>Phytophthora rubi</i>
Wake@Haven 'NN08002' USPP# 28,934	Early-mid	M-L	Very firm, good flavor, above avg Brix, very high yield	Lt-med red	Vigorous, long hanging laterals	IQF	No RBDV detected; Susceptible to <i>Phytophthora rubi</i>
Cascade Premier USPP#30,980	Early	L	Firm, good flavor, above avg Brix, good yield	Med red	Moderate vigor, upright laterals	Fresh and processing	No RBDV detected; Some <i>Phytophthora rubi</i> tolerance
Wake@Vale 'PB57R1'	Mid	M	Very firm, very good flavor, high Brix, high yield	Dark red	Vigorous	IQF	No RBDV detected; Shows tolerance to <i>Phytophthora rubi</i>
Cascade Legacy™	Mid	L	Firm, good flavor, yields slightly higher than Cascade Premier	Med red	Moderate vigor, long laterals and leaves	Fresh and Processing	Susceptible to RBDV but slow to show symptoms; Some tolerance to <i>Phytophthora rubi</i> ;
Chemainus	Mid	M-L	Firm, good flavor, above avg Brix	Lt-med red	Strong upright canes	Fresh and processing	Susceptible to RBDV and <i>Phytophthora rubi</i>
Meeker	Mid	M	Firm, good flavor, above avg Brix	Med red	Vigorous, long laterals	Processing	Susceptible to RBDV and <i>Phytophthora rubi</i>
Tulameen	Mid	L	Firm, attractive, excellent flavor	Light red	Vigorous	Fresh	RBDV susceptible; Very root rot susceptible
Cascade Harvest USPP#26,369	Mid-late	L	Moderately firm, good flavor, above avg Brix	Lt-med red	Vigorous, upright laterals	Fresh and processing	RBDV resistant; Moderate <i>Phytophthora rubi</i> resistance
Saanich	Mid-late	M-L	Moderately firm, good flavor	Light red	Upright, bendable laterals	Processing	Slow RBDV infection; <i>Phytophthora rubi</i> susceptible
Cascade Delight	Late	L-XL	Very firm, good flavor	Lt-med red	Very vigorous	Fresh	Resistant to <i>Phytophthora rubi</i>
Wake@Field USPP# 21,185	Late	M	Very firm, above avg Brix, very high yield	Med-dark red	Long branching canes	IQF	Slow RBDV infection; <i>Phytophthora rubi</i> tolerant
